Career Profile:

I am an experienced and Degreed Front End Developer seeking opportunities in Front End Development. I am seeking to continue my practice of bringing art to software and designing applications that not only are functioning, but aesthetically pleasing. I have been developing software and web applications in various languages for over 12 years. (See list of known software languages) I have released a globally recognized and used video game as open source. I have worked for 2 global scale corporations. Since June 2013 I have been working on various contracts, but I feel now, I need a more reliable position.
